

1.Introduction

We are seeing many portfolios in our routine life. My project is to build a website 'MyPortfolioBuilder' which will create your portfolio immediately. You can create portfolio by just filling one simple form and choosing an interesting template which will be provided by the dev team.

2. Expected list of Features

There will be state management by login and logout, with also user authentication and authorization. There will be pre designed templates created by team, you just have to select one and fill the form.

3.Market Survey

There are many websites available for creating creative portfolios but in all of those users have to maintain designing aspects, users have to design their portfolios they will make designing easy that's it.

4. references

You can refer BuilPortfolio.in, wix.com etc.
